

Artificial Intelligence is moving quickly. Most businesses are experimenting. Few are implementing strategically.

The question is: who is leading your AI strategy?

🎯 What Is a VAO?

- ✓ Audit applications and workflows
- ✓ Identify high-ROI automation opportunities
- ✓ Develop practical AI roadmap
- ✓ Establish governance and secure AI policies
- ✓ Provide ongoing execution oversight

Otto Start – Executive Jumpstart Program

- ✓ Executive strategy session
- ✓ AI readiness assessment
- ✓ Automation roadmap and ROI plan
- ✓ Governance framework

⚙️ Strategy & Execution

In-House Automation Engineers

Unlike advisory-only firms, Innovative Automations includes dedicated in-house automation engineers in every ongoing VAO engagement.

Your VAO doesn't just recommend—our engineering team designs, builds, deploys, tests, monitors, and optimizes automations month after month.

- Dedicated in-house automation engineers (not outsourced)
- Automation workflow design, build & deployment
- Secure AI enablement and API integrations
- Testing, monitoring & continuous optimization
- Monthly execution capacity included

Outcome

- 📦 Structured AI leadership
- 📦 Consistent automation progress
- 📦 Responsible implementation
- 📦 Measurable operational efficiency
